PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience building and scaling production web applications with React.js, Next.js, Node.js, and GraphQL. Skilled in API automation, cloud deployment (AWS), and production troubleshooting across full-stack and DevOps workflows. Delivered business-critical platforms supporting 10,000+ users across India, GCC, and Indonesia, with a consistent record of improving performance, reliability, and operational efficiency.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, SQL

Frontend: React.js, Next.js, Vite.js, Redux, Tailwind CSS

Backend: Node.js, Express.js, NestJS, GraphQL, REST APIs

Mobile: React Native

Databases: PostgreSQL, MongoDB, MySQL, Redis

Cloud & Infrastructure: AWS (EC2, S3), Docker, Nginx, PM2, Linux, GitHub Actions, CI/CD

Tools: Git, GitHub, Postman, VS Code

PROFESSIONAL EXPERIENCE

Software Programmer — Enpointe IT Services Pvt Ltd **Jul 2023 – Present**

- Engineered and maintained production-grade web applications serving **10,000+ users** using Next.js, Node.js, GraphQL, and PostgreSQL.
- Delivered business-critical modules, including Box Office and Auditorium Management systems, supporting operations across **India, GCC, and Indonesia**.
- Architected and implemented Role-Based Access Control (RBAC), securing application workflows and streamlining user management for business teams.
- Built scalable dashboards, CMS modules, and operational tools that improved reporting accuracy and day-to-day business operations.
- Optimized backend performance by integrating PostgreSQL with Redis caching, improving application responsiveness.
- Automated repetitive operational workflows by reverse-engineering REST and GraphQL API request flows, reducing manual effort and improving execution accuracy.
- Developed Python-based automation scripts and internal utilities that streamlined repetitive operational tasks and increased team productivity.
- Managed application deployments and production environments using AWS EC2, S3, Docker, Nginx, PM2, and GitHub Actions, ensuring reliable releases and system availability.
- Diagnosed and resolved production issues across frontend, backend, deployment, and infrastructure layers, minimizing downtime for business-critical applications.
- Improved frontend performance, accessibility, and SEO by applying modern React.js and Next.js best practices.
- Collaborated with cross-functional teams to analyze operational requirements and deliver scalable software solutions.

PROJECTS

Arzen — Digital Signage & Cinema Operations Platform

Tech: NestJS, Vite.js, PostgreSQL, Electron, Python, Linux

- Contributed to a production-grade digital signage platform managing concession menus, schedules, and promotional content across multiple cinema locations.
- Built operational features including read-only role management, device health monitoring, Excel report export, and time-based content scheduling.
- Diagnosed and resolved client-side display and Linux-based firmware issues, ensuring reliable device provisioning and uptime in production.

NSOS — Citizen Grievance & Municipal Engagement Platform

Tech: Next.js, React Native, Node.js, PostgreSQL, REST APIs

- Developed a multi-tenant platform enabling municipal representatives to engage citizens through web portals, mobile apps, and administrative dashboards.
- Designed a grievance management system supporting complaint submission with image attachments and real-time status tracking.
- Built secure authentication and tenant onboarding workflows, automatically provisioning credentials and branded portals for each representative.

Citrine — Wellness Center Management System

Tech: Vite.js, Node.js, Express.js, MySQL

- Developed a role-based management system streamlining appointment scheduling, therapist management, billing, and reporting.
- Built Admin and Super Admin dashboards providing centralized visibility into therapist performance, revenue, and daily financial reports.
- Implemented secure RBAC and optimized CRUD operations, supporting reliable tracking across multiple payment methods.

Ancient Avenue — Ayurvedic E-Commerce Platform

Tech: Next.js, Node.js, Express.js, MongoDB

- Built a customer-facing storefront using Next.js, enabling product browsing, order placement, and order tracking.
- Developed an admin dashboard and analytics module for catalog management, revenue insights, and customer growth tracking.

EDUCATION

Bachelor of Science in Computer Science

University of Mumbai, Mumbai, Maharashtra, India — Aug 2020 – Mar 2023
