HARSH SAWANT

Backend-Focused Software Engineer | Node.js · NestJS · PostgreSQL · AWS

Mumbai, India • 8451933708 • harshhsawaant@gmail.com • linkedin.com/in/hs-software-developer • github.com/harsh819

PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience owning production web applications end to end: Node.js/NestJS and GraphQL backends, PostgreSQL with Redis, and AWS deployments. Known for root-cause analysis: reverse-engineering unfamiliar systems and tracing failures across API, database and infrastructure layers. Supported 10,000+ users across India, GCC and Indonesia. MCA (2026), seeking a backend-focused product engineering role.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL

Backend: Node.js, NestJS, Express.js, GraphQL, REST APIs, RBAC, Python automation

Databases: PostgreSQL, MySQL, MongoDB, Redis

Cloud & DevOps: AWS (EC2, S3), Docker, Nginx, PM2, Linux, GitHub Actions, CI/CD

Frontend: React.js, Next.js, Vite.js, Redux, Tailwind CSS, React Native

PROFESSIONAL EXPERIENCE

Junior Software Programmer — End Point IT Services Pvt Ltd Sep 2023 – Present

- Root-caused a 3–4 year recurring defect where shows after 00:00 did not appear on box-office and auditorium displays. Using restricted read-only client database access, traced it to the show-date query logic and documented the evidence in an HTML report for the client. The query was fixed and the issue closed within 2 weeks.
- Built and maintained production applications serving 10,000+ users (Next.js, Node.js, GraphQL, PostgreSQL), including Box Office and Auditorium Management modules used across India, GCC and Indonesia.
- Designed and implemented Role-Based Access Control (RBAC) to secure application workflows and simplify user management for business teams.
- Improved backend responsiveness by adding Redis caching in front of PostgreSQL.
- Automated manual operational workflows by reverse-engineering REST and GraphQL request flows; wrote Python scripts and internal utilities that cut repetitive effort and errors.
- Own day-to-day production monitoring for cinema clients: triage recurring issues, report root causes to seniors, and validate every new cinema locally before it goes live on production.
- Manage deployments on AWS EC2/S3 with Docker, Nginx, PM2 and GitHub Actions, following a pre-release checklist to protect production stability.
- Built dashboards, CMS modules and operational tools that improved reporting accuracy.

PROJECTS

B2B Food Products Delivery Platform

Tech: Next.js, Python, MySQL, Docker

- Built a three-portal system (customer, admin and rider) covering ordering, payments and delivery fulfilment.
- Implemented RBAC with a super-admin approval step for customer sign-ups, so only verified business customers can access the platform.

Arzen — Digital Signage & Cinema Operations Platform

Tech: NestJS, Vite.js, PostgreSQL, Electron, Python, Linux

- Built device health monitoring, read-only role management, Excel report export and time-based content scheduling for a multi-cinema signage platform.
- Diagnosed and fixed client-side display and Linux firmware issues to keep device provisioning reliable in production.

NSOS — Citizen Grievance & Municipal Engagement Platform

Tech: Next.js, React Native, Node.js, PostgreSQL, REST APIs

- Built a multi-tenant platform (web, mobile and admin) with grievance tracking, image attachments, and automated tenant onboarding that provisions credentials and a branded portal per representative.

Citrine — Wellness Center Management | Ancient Avenue — Ayurvedic E-Commerce

Tech: Vite.js, Next.js, Node.js, Express.js, MySQL, MongoDB

- Citrine: role-based scheduling, billing and revenue dashboards. Ancient Avenue: Next.js storefront with order tracking and an admin analytics module.

EDUCATION

Master of Computer Applications (MCA) — Manipal University Jaipur | CGPA: 8.96/10 Sep 2024 – Oct 2026

Bachelor of Science in Computer Science — University of Mumbai Aug 2020 – Mar 2023
